

Claremont Unified School District Parent Connection Application

Parent Connection is a web-based application that allows a parent to view data on all enrolled dependents within the district, (i.e. if a parent has a student at Oakmont and Claremont High School, they will be able to see information on both students). Using a confidential PIN number and password, parents can connect to the school district's database using a web browser to view their student's data, such as progress reports, attendance records, homework assignments, report cards, transcripts, test history, classroom news, and other information about the student.
